Phase Functionalization of compounds Regulation of TP53 Activity

Bological oxidations TCR signaling

Costimulation by the CD28 family

Generic Transcription Pathway

Mitochondrial biogenesis Signaling by Receptor Tyrosine Kinases

Intracellular signaling by second messengers

e**plyrsolins dike** Growth Factor 1 Receptor (IGF1R)

Semaphorin interactions

PIBB ARWAtend KERSIGREGIODATE PISK/AKT Signalin

IGF1R signaling cascade

PI3K/AKT Signaling in Cancer

IRS-mediated side and inevents triggered by IGF1R

Metabolism

size
